PowerConnect
for SAP Solutions

RHONDOS

PowerConnect for SAP Solutions Delivers Real-Time SAP Security and Monitoring

Keep your organization safe from cyber and internal threats.

PowerConnect provides insights into SAP so that you can correlate SAP and non-SAP data. Its strengths include:

- Automating cyber alerts across all SAP system layers
- Correlating SAP events in Splunk Enterprise Security to empower your Security Operations Center (SOC)
- Streamlining compliance audits

- Improving investigation timelines
- Detecting threats including insider fraud and suspicious activity
- Real-time intrusion detection

Maturity Model for SAP Security

Ask RHONDOS how to move your organization from High Risk to Secure in two weeks.

Advanced

Mature

Secure

High Risk

High Risk		Secure	Mature	Advanced
Exposed Manual SAP Security Monitoring (Native)	**Vulnerable** Track historical SAP audit logs over time (SM20)	**Fortified** Real-time user activity alerts and reports in centralized data platform (Splunk Core)	**Correlated** SAP security posture integrated holistically across IT organization (Splunk Enterprize Security)	**Automated** Security events and low-level incidents automatically resolved. Immediate response to high-level threats (Splunk SOAR & UBA)
